Prevalence and risk factors of cognitive impairment in Parkinson's disease patients: one-year follow-up. Cognitive deficits are an important cause of functional disability in Parkinson's disease (PD), especially in the late stages of the disease. To assess the prevalence of cognitive impairment during a 1-year follow-up in PD, and its associated factors. Baseline evaluation included demographic, clinical, neuropsychological, urodynamic and motor assessment, which was repeated after 1 year. Presence of cognitive impairment was classified in dementia (DSM-IV) or mild cognitive impairment (MCI) according to the NINDS-AIREN criteria and a cognitive decline scale (CDL). The prevalence of cognitive impairment was assessed at baseline and after 1 year, and the associated factors were studied. Sixty-five PD patients were enrolled. At baseline, prevalence of dementia was 3.8% and MCI was 13.8%. At 1 year, prevalence of cognitive impairment was 32.3% and cognitive decline was registered in 21.5%. The factors independently associated with cognitive impairment were age (OR 2.11, 95% CI 1.06-4.15,  $p = 0.033$ ) and disease duration (OR 1.21, 95% CI 1.05-1.39,  $p = 0.010$ ). Baseline use of dopaminergic treatment was inversely associated with decline (OR 0.14, 95% CI 0.02-0.84,  $p = 0.032$ ). The prevalence of cognitive decline and cognitive impairment was high in PD patients, especially in the late stages of the disease. The factors independently associated with cognitive impairment at baseline were age and disease duration.

Q: SQL count duplicates even when NULL values are present Trying to count instances of duplicates in a column even though the count occurs in a table with NULL data. Consider the following SQL: select count(\*) from (select 1 count(\*) from t1 union select 1 count(\*) from t2 union select 1 count(\*) from t3) Which returns: count 3 Now what I would like to achieve is: count 4 Which is when all three tables have a count of 1. Does anyone know how this can be achieved please? Many thanks in advance. A: It's not even necessary to count the unioned rows at all. You could just count the distinct values of your table select count(distinct count) from (select 1 count union all select 2 count union all select 3 count) t John Fisher, 1st Baron Fisher John Fisher, 1st Baron Fisher CB (11 June 1708 – 21 March 1776) was a British politician who served as Leader of the House of Commons from 1751 to 1755 and Chancellor of the Exchequer from 1755 to 1763. Important: If you are experiencing issues with texture popping or geometry issues with monster carcasses (possible warping of the skin and the monster head), make sure you have the latest version of Skyrim SE. SkyUI.se must be enabled to use the mod. If you use any mod that tweaks that, then it will overwrite all changes made by this mod. This mod does not alter any standard game files. This is the best possible compromise of realism and performance for Skyrim. It will cost you some animation and texture memory, but will not bog down
